To Whom It May Concern:

We were blessed to meet Larry Habbetz, the owner of Gulf Coast Sound Productions, in 2003 as we were in the final stages of building our new sanctuary. We had actually started out with another sound company that wasn't able to fulfill their obligations, and it was very close to the time that the sound system needed to be installed when we were introduced to Larry.

He immediately saw our need, and began working to help us get the latest technology. Through his close ties with EV, he was able to update equipment that had been previously ordered and give us a state-of-the-art system. EV, on several different occasions, has brought prospective clients by to listen to the sound system and to tour our facility. Because of Larry's promptness, professionalism, and special attention to detail on our job, there were no delays in having our first service on Easter Sunday morning in 2004.

Since that time, he has become part of the FPC family. Our church hosts a meeting each year in August with hundreds of guests coming from all over the United States. We depend on Larry to run the sound system during this time. He has a heart for the ministry, comes early to go over everything, and gives excellent service.

He has helped with several other projects; always offering a competitive bid, and giving impeccable workmanship. We have had an excellent relationship with Larry for almost ten years now and are happy to recommend him and his company, Gulf Coast Sound Productions.

Sincerely,

Pastor J.N. Holmes
