

HELPING FAMILIES FIGHT, SURVIVE, AND LIVE WITH CANCER

November 21, 2011

To Whom It May Concern:

In 2009, Miles Perret Cancer Services (MPCS), a 501(3)(c) non-profit organization located in Lafayette, LA, planned a unique fundraising event to be held during the week of the Louisiana Gulf Coast Oil Exposition. The 2009 Benefit Concert featuring Clint Black was new territory for us since we had no prior experience planning a music concert of any type.

As the planning began, we were pleased to learn of the expertise available in our local community. We selected Larry Habetz and his team at Gulf Coast Sound Productions to provide sound and light. Larry was patient with our questions, educated our team along the way, and ensured that his company could meet the needs of our guest artist. We truly appreciated Gulf Coast Sound's professionalism throughout the partnership. The 2009 event was very successful and Larry's team played a key role in that success.

Last month, MPCS held its 2nd Benefit Concert featuring Randy Travis. We turned to Gulf Coast Sound Production for sound and light needs, and once again Larry and his team exceeded our expectations. We look forward to partnering with Gulf Coast Sound again in 2013.

Without hesitation we recommend Gulf Coast Sound Productions and would welcome an opportunity to answer any questions you may have or provide additional information. Please contact me at 337-984-1920 or njones@milesperretcenter.org.

Best regards,
