

December 6, 2011

I am writing this letter of recommendation on behalf of Larry Habetz with Gulf Coast Sound.

Gulf Coast Sound did the design and install for the sound system in our 1500 seat auditorium. From the very beginning of the project Larry was very personable and involved. His relationships with Electro Voice, Sound Production, and with Yamaha enabled him to be able to have specialist from every company that we had products from to come to fine tune the system to get the most pristine sound possible. Our Goal was to have a quality sound system that any artist could bring a full band and not have to bring any additional sound equipment. Gulf Coast Sound was able to attain that goal and surpass it. Every promoter in our area that has toured our facility has been awestruck at the sound quality and said, "There is not a bad seat in the house...no matter where you are sitting you can hear great!" We personally have been more than pleased with the outcome of the project and with our entire experience with Gulf Coast Sound.

All of the employees with Gulf Coast Sound were very professional and easy to work with. Being so knowledgeable in each of their own expertise, we had complete confidence in their work throughout the project.

In conclusion, I would highly recommend Gulf Coast Sound to anyone in need of a quality sound system and looking for a wonderful experience with a great company. We have continued to have a close relationship with Gulf Coast Sound after the project and they have been more than eager to answer any questions we have had after our install was complete.
